Steadfastness and reliability are the hall mark of the ox. They are very dependable and possess an innate ability to do great deeds. Their main asset is their ability to work systematically and they always try to achieve their goal despite all odds. Socially, The oxen are perceived as being far too serious and reserved. The Oxen tend to be stubborn, dogmatic, my-way-is-the-right way kind of people who have no concept of when to back down. They are not bothered with what other people think and prefer to do what makes them feel best.

As a lover, friend, family member or housemate, the Ox makes a wonderfully strong, tender and affectionate companion who is protective and always reliable.

It would be better if the Oxen overcome a judgmental nature that keeps them from getting close to others. If they can learn to value their own good qualities, they'll have more room in their hearts for others.
