

# Rooster

**Rooster Years- 1933, 1945, 1957, 1969, 1981, 1993, 2005, 2017, 2029.**

Roosters are best defined by the term Conservative. They are quick thinkers practical and resourceful; preferring to stick to what is tried and true rather than taking messy, unnecessary risks.

Observation skills are the principal strength of the rooster. It's hard to slip anything past a Rooster, since they seem to have eyes in the backs of their heads! This quality explains why so many successful lawyers, brain surgeons and accountants happen to be roosters. Socially, they have no hesitation in telling the truth and keeping their word. Appearance and orderliness is the keyword for roosters. They expect to be in control, especially over their appearance and of their surroundings.

In relationships, The Rooster needs the right partner, one who understands this Sign's basically conservative nature. With the right person, the Rooster can be the most loyal, trusting and supportive mate around, one who bends over backward to please its loved ones.

Roosters need to learn to value their heart and soul as much as their good looks. This Sign would also do well to learn to adopt the philosophy of "live and let live". This will help this Sign learn to let others be whomever and however they are.
